The Thematic Track

„Data Science in Economics, Finance and Management"

at International Federation of Classification Societies Conference

The Conference of International Federation of Classification Societies will be held in San Jose, Costa Rica, from July 15th to July 19th, 2024.

I will organize sessions on the Thematic Track „Data Science in Economics, Finance and Management". There are numerous topics that fall in this area, including:

- Theoretical and methodological issues, for example: classical multivariate data analysis, machine learning methods, classification, discrimination and clustering methods, alternative data analysis, etc.

- Application of data analysis methods in different areas, including for example: macroeconomics, microeconomics, household economics and finance, financial markets, banking, corporate finance, logistics, marketing, managerial decisions, etc.

If you have intention to present a paper within this thematic track, please submit abstract according to the guidelines given at the conference website:

IFCS (ucr.ac.cr)

In addition, please send me information on your paper (E-mail: krzysztof.jajuga@ue.wroc.pl) so that it will help to organize sessions.

Please also note that there are publication opportunities (presented on the conference website).

I am looking forward to future cooperation.

Professor Krzysztof Jajuga

President-Elect of IFCS

Department of Financial Investments and Risk Management

Wrocław University of Economics and Business
